kiln

A solid base. For local CI.

A Wolfi-based runner image for act.

WOLFI / GLIBC / ACT

A prepared environment for the work ahead.

Built for the local run.

Kiln is a Wolfi-based, glibc-native container image for running GitHub Actions locally with act. It includes shell utilities, Node.js, Python, a C/C++ toolchain, Git, and Docker clients.

THE SMELTERY FAMILY

Shared type and surfaces connect Kiln to Bellows. The chamber mark and fired-gold accent identify the runner environment.

bellows / kiln

01

Solid foundations

Wolfi and glibc, with the tools local workflows need.

02

Made to inspect

Published signatures, SBOMs, and build provenance provide evidence you can inspect.

03

Clear about limits

Ubuntu-style tags are aliases. Kiln uses apk and does not reproduce the whole GitHub-hosted VM.

One identity. Every context.

PRIMARY LOCKUP

ON A DARK SURFACE

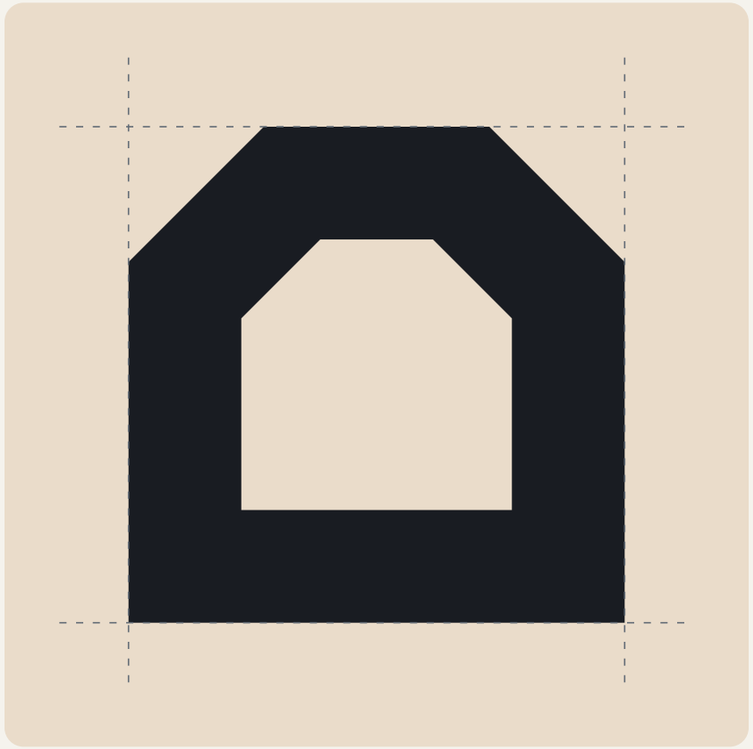

ONE COLOR

A firebrick chamber reduced to its outline: a stable enclosure around the tools that do the work.

A mark that works small.

CLEAR SPACE / 1/4 OF SYMBOL HEIGHT

Keep the clear space around the full visible lockup. Preserve its geometry, orientation, and spacing.

DIGITAL MINIMUMS

Symbol: 16 px high

kiln

Lockup: 160 px wide

Use the tile for app and community avatars.

Use the supplied light, dark, and one-color artwork. Keep backgrounds quiet. Avoid extra effects and decorations inside the mark.

Fired gold. Solid ground.

Use Paper and Ink for most of the composition. Let Gold carry one point of emphasis.

Ink	Paper	Gold	Sand	Steel
#191C22	#F5F3ED	#E5B05C	#EADCCA	#626B75
Primary text / dark surface	Light surface	Brand signal / key action	Soft supporting surface	Secondary text on Paper

TEXT PAIRINGS / CALCULATED SRGB CONTRAST

15.4:1
Ink on Paper

8.7:1
Ink on Gold

6.5:1
Burnt Gold on Paper

Use #7A4D16 for accent text on light surfaces. Use Paper and #BBC2CA for text on Ink.

Status colors: success #2C6B50, warning #805B00, error #B23635. Add a visible status label.

PRIMARY / SPACE GROTESK

Useful, with a little character.

Distinctive letterforms for the identity. A clear hierarchy for everything around it.

HIERARCHY / SIZE, LINE HEIGHT, WEIGHT

Display	64 / 68 / 600	**Built for the work.**
Heading	32 / 38 / 600	**Pull the runner image.**
Body	16 / 26 / 400	An environment for local CI.

JETBRAINS MONO

```
$ docker info

$ act --help
```

THE SYSTEM

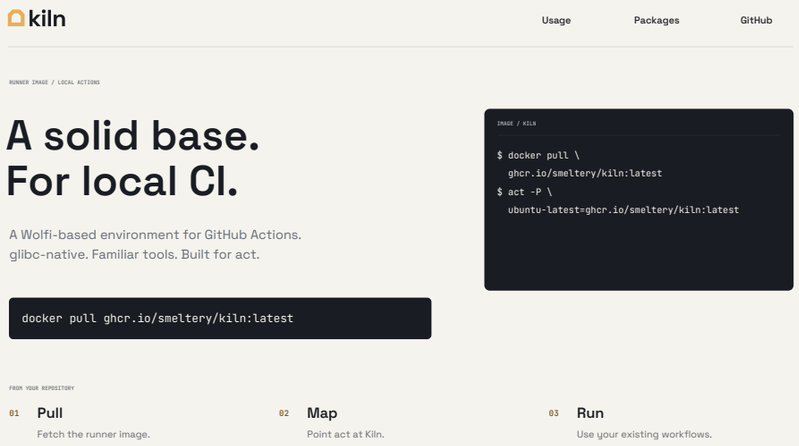

Space Grotesk 400-700 for identity, headings, and body. JetBrains Mono 400-500 for commands and data.

The same system, put to work.

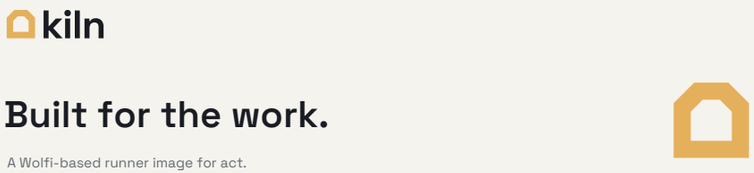

SOCIAL PREVIEW / 1280 X 640

DOCUMENTATION CONCEPT / 1600 X 900

README BANNER / 1600 X 480

AVATAR / FAVICON

Same mark. Same type. Same signal.

Personality in the right places.

PRIMARY LINE

A solid base.
For local CI.

SECONDARY LINE

Built for the work.

PRODUCT DESCRIPTOR

A Wolfi-based runner image for act.

Name Wolfi and its compatibility limits. Keep image references and version claims exact. Explain how to inspect signatures, SBOMs, and provenance.

A COMPLETE WORKING KIT

Identity artwork

Outlined SVG lockups, wordmarks, symbols, app tile, transparent PNGs, and favicon sizes.

Foundations

Font files and licenses, CSS variables, JSON tokens, palette, and usage rules.

Applications

Social preview, README banner, documentation concept, and a responsive local brand guide.
